Christian MAITRE

Founder and CEO of Caspera Lab, a boutique strategic advisory firm with a singular mission: *Prepare your Future.*

72% of telecom operators have no structured AI-native strategy. The window to act is three years — before early movers open an irreversible gap. Caspera Lab gives leadership teams the diagnosis, the roadmap, and the methodology to move forward. Vendor-neutral. Operator-side. No compromise.

Trusted advisor to C-level executives on transformation strategy, AI adoption, and digital readiness. Former Deputy CIO at Orange Group. Former VP Smart Cities. Active contributor to leading industry bodies — TM Forum, and others — and conceptual author of two foundational frameworks: **Autonomous Networks** and **DMM**, the TechCo digital maturity model.

Regular speaker and panelist at major international events including GOSIM, TM Forum DTW, GITEX, and FutureNet World.
