

GOSIM Paris 2026

May 5-6, 2026 Station F, Paris

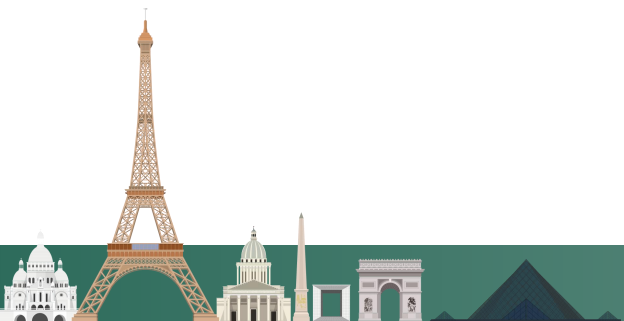

WU Yonghui

Fudan University
yhwu@fudan.edu.cn

His book series “**Collegiate Programming Contests and Education**” has been published in simplified and traditional Chinese and English.
Since 2013, he has been **giving lectures** not only in China, but also in other countries.

- ◆ All professions and jobs that rely on tool-based skills, including most programmers' work, are being displaced by **AI technologies**.
- ◆ Training abilities for **computational thinking**, and **mathematical thinking** integrated into solving problems by programming is the breakthrough point for the reform of computer education in AI era.
- ◆ Our work consists of constructions for **teaching materials, curriculums, and the teaching system for "solving problems by programming"**.

Thanks!
