Trusting AI Agents

Panel Discussion

CONTENTS

GOSIM Paris 2026

Part 01

Introductions

Part 02

The Setup

Part 03

The AI Trust Stack

Part 04

The Consequences and Future

Part 05

Key Takeaways

Wenjing Chu
Moderator

Wenjing is the Sr. Director of Technology Strategy on Trust of AI Agents & Agentic Systems at Futurewei. He is a long time leader of open source communities.

He chairs the AI and Human Trust (AIM) Working Group in Trust over IP (ToIP) where the specification of TEA (TSP-Enabled AI Agents), including TMCP/TA2A (running MCP and A2A over TSP) is being developed. He is the co-author of the Trust Spanning Protocol (TSP) specification and its implementation.

**Markus
Tavenrath**

Markus Tavenrath studied computer science with a focus on computer graphics at RWTH Aachen University. This academic background provided a solid foundation for his career in the technology industry.

Markus is also a co-founder of the Vulkan-Hpp project, which has been beneficial to the Vulkan community. His efforts have helped improve the use and implementation of Vulkan.

Recently, Markus was elected as the Chair of the ML Council at Khronos. In this role, he helps coordinate and support AI and machine learning initiatives within the Khronos group. His election to this position reflects his expertise and leadership qualities.

Wendy Seltzer

Wendy Seltzer is a lawyer and technologist, currently consulting via the Law Office of Wendy Seltzer. She is a founder of the First Person Cooperative, addressing governance of decentralized trust networks for personhood recognition and agency.

As Principal Identity Architect at Tucows, she helped to found the Ayra Association. She previously served as Strategy Lead and Counsel to the World Wide Web Consortium (W3C) at MIT, improving the Web's security, availability, and interoperability through standards. As a Fellow with Harvard's Berkman Klein Center for Internet & Society, Wendy founded the Lumen Project (formerly Chilling Effects Clearinghouse), the web's pioneering transparency report to measure the impact of legal takedown demands online. She seeks to improve technology policy in support of user-driven innovation and secure communication. She co-authored the second edition of *Blown to Bits: Your Life, Liberty, and Happiness After the Digital Explosion*.

**Drummond
Reed**

Drummond has spent over a quarter-century in Internet identity, security, privacy, and trust infrastructure. He is currently founder of the First Person Project and a Director of the First Person Cooperative. From 2021 to 2025, he was Director of Trust Services at Gen (formerly Avast) after their acquisition of Evernym, where he was Chief Trust Officer. He is co-author of the book, *Self-Sovereign Identity* (Manning Publications, 2021), and co-editor of the W3C Decentralized Identifiers (DID) 1.0 specification. He currently serves as Governance Lead for the Ayra Association. He is founding board member of the OpenWallet Foundation and Trust Over IP (ToIP), where he serves as co-chair of the Technology Stack Working Group, the Decentralized Trust Graph Working Group, and the Concepts and Terminology Working Group. In 2002 he received the Digital Identity Pioneer Award from Digital ID World, and in 2013 he was cited as an OASIS Distinguished Contributor.
