- Daniel SHI is an AI Evangelist and Global Business Representative at MiniMax, one of China's leading foundation model companies.
- With a career spanning telecom, cloud-native infrastructure, and AI-native applications, Daniel brings a rare cross-domain perspective to the intersection of frontier AI and enterprise go-to-market strategy.
- As a trilingual professional (French/English/Chinese), he serves as a valuable bridge between MiniMax's R&D capabilities and the global market — driving adoption of MiniMax's multimodal AI models and agentic solutions across global enterprise and developer ecosystems.

MiniMax From Day 1

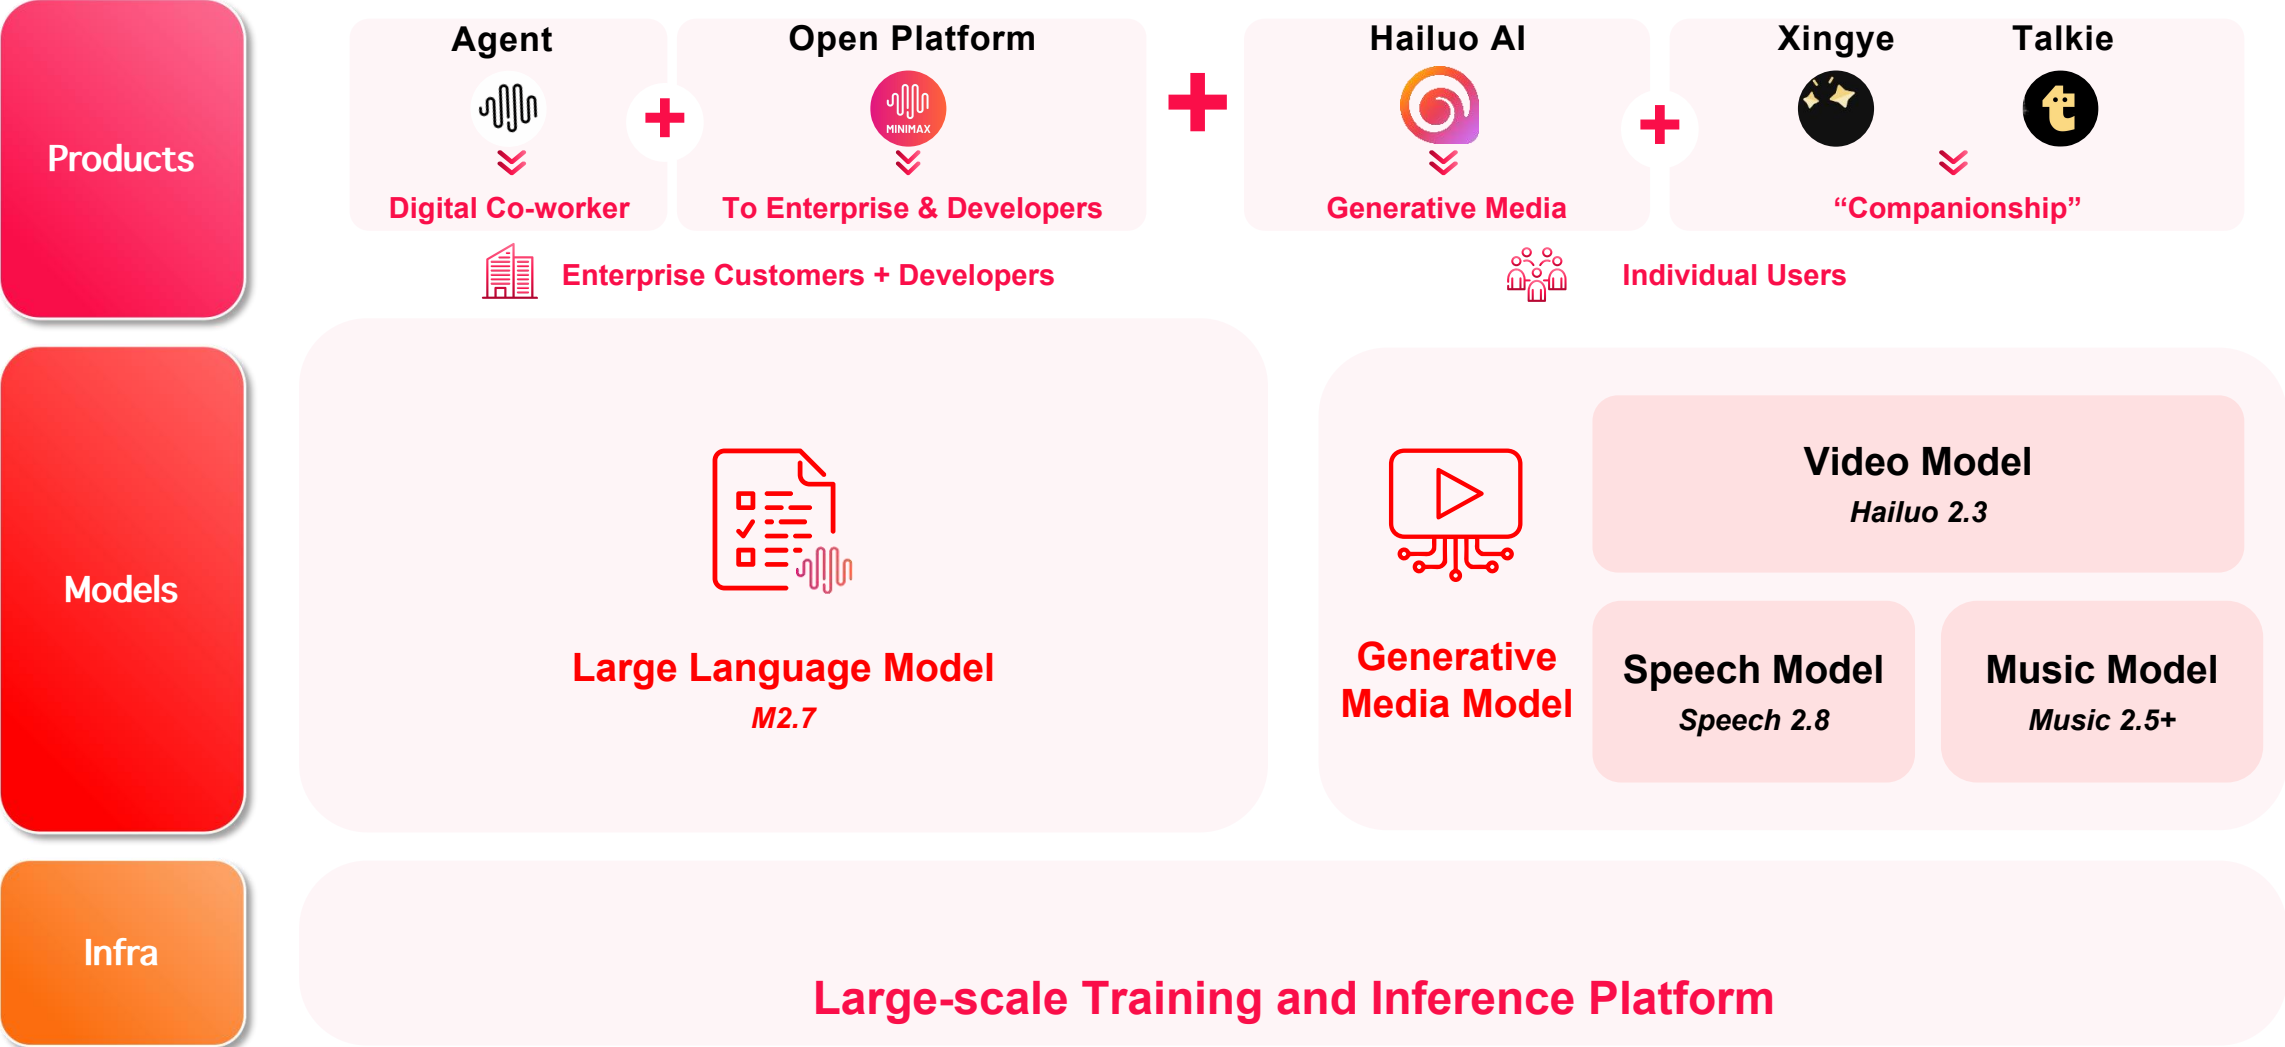

MiniMax
Day 1

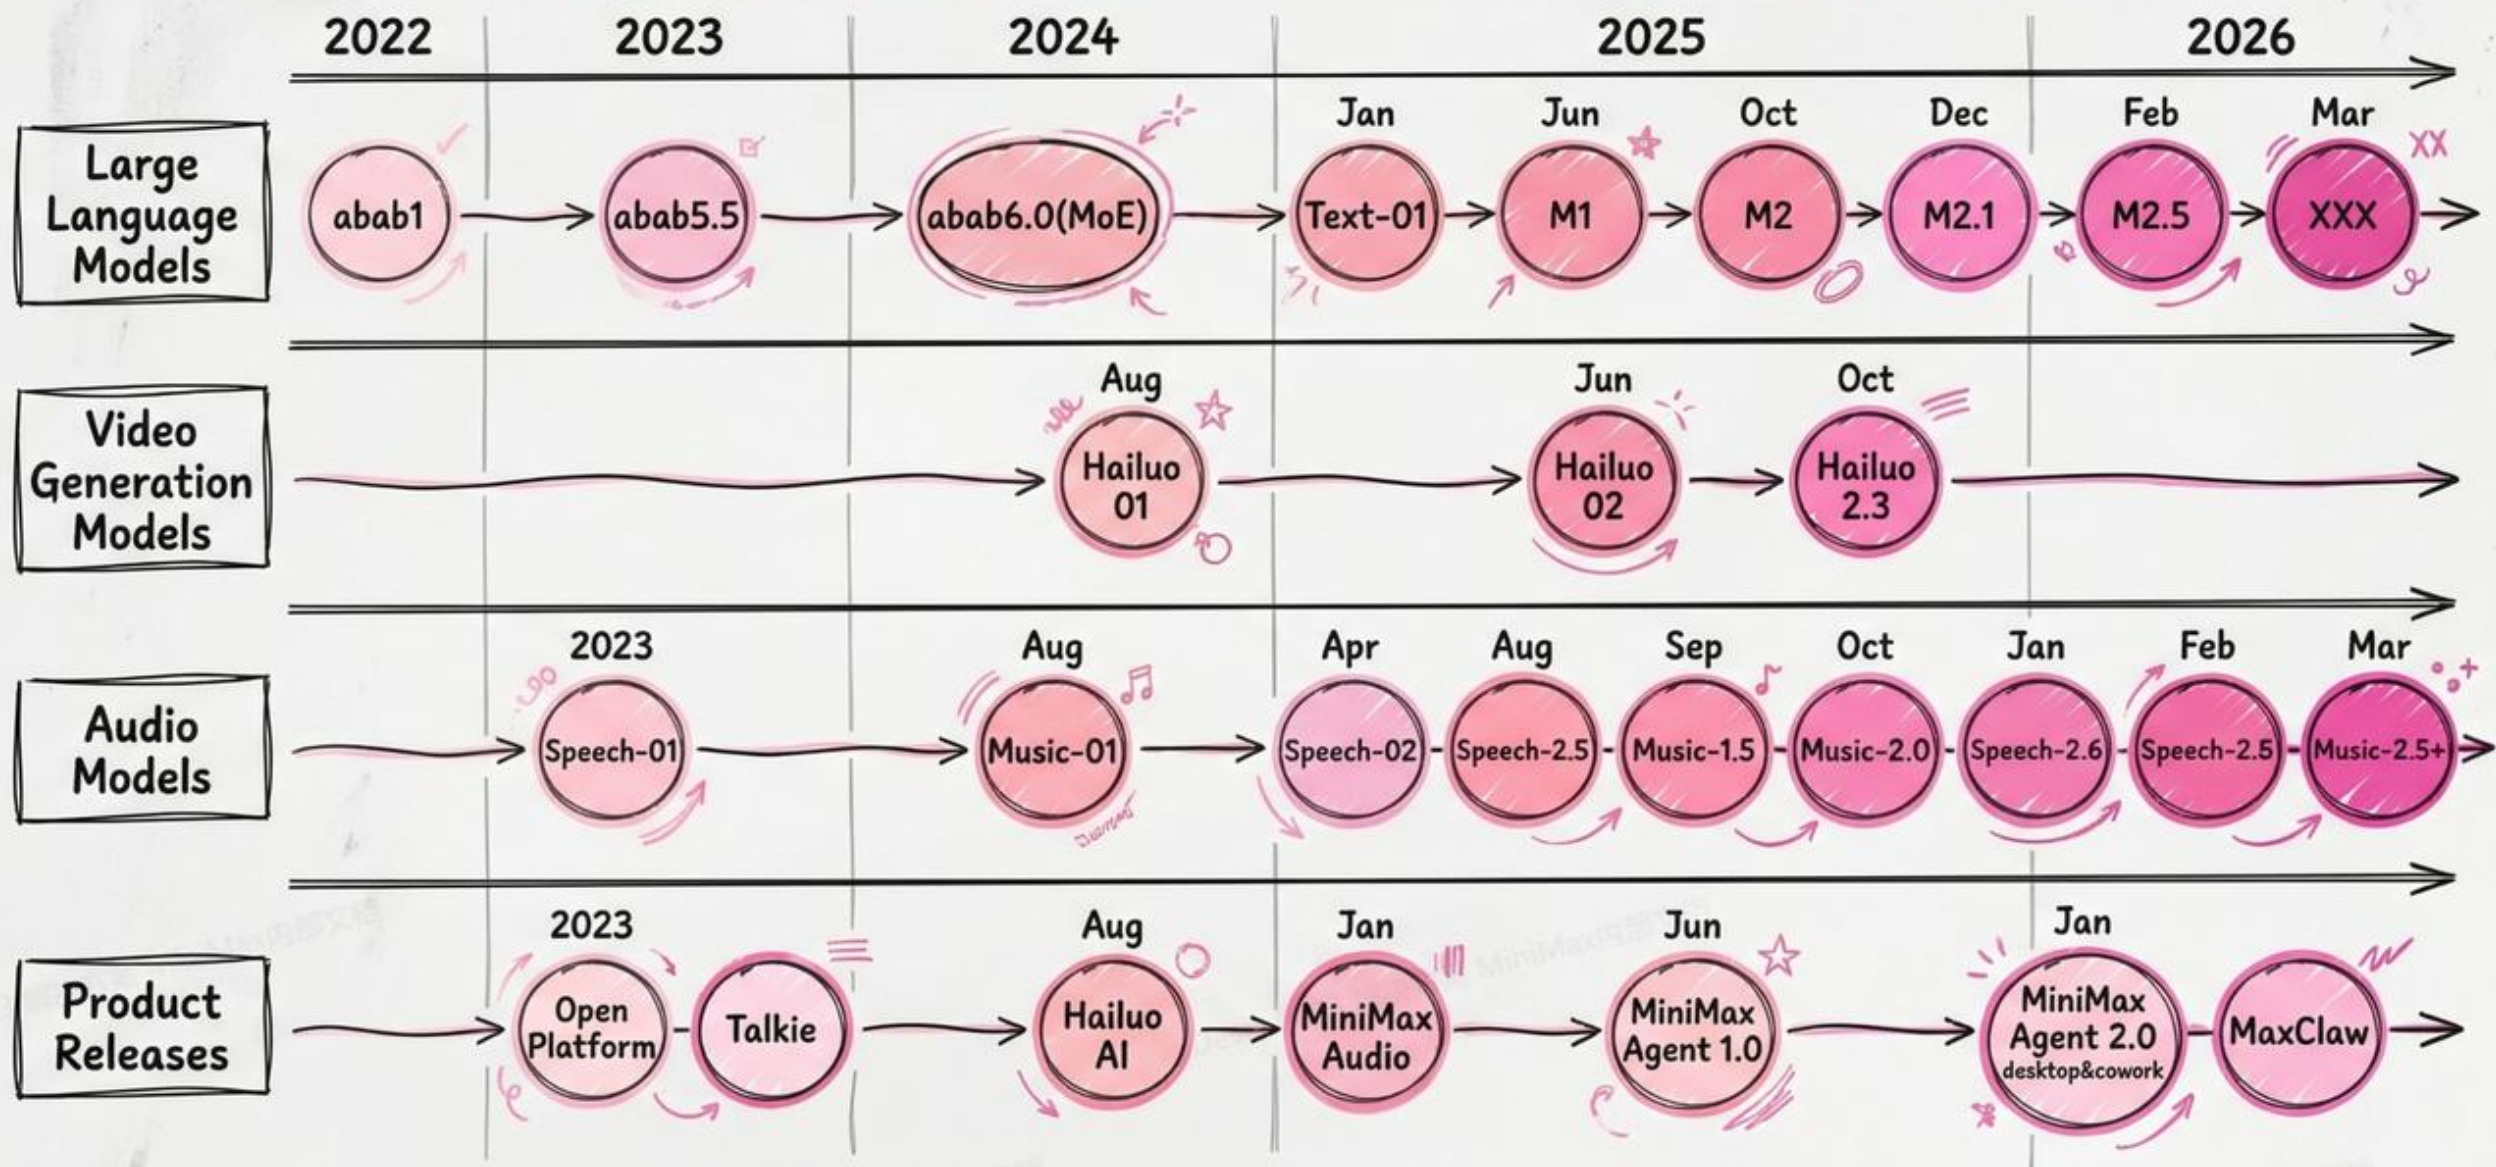

Our Mission
Intelligence with Everyone

Our Vision
Pursue AGI in a **Scalable** Way

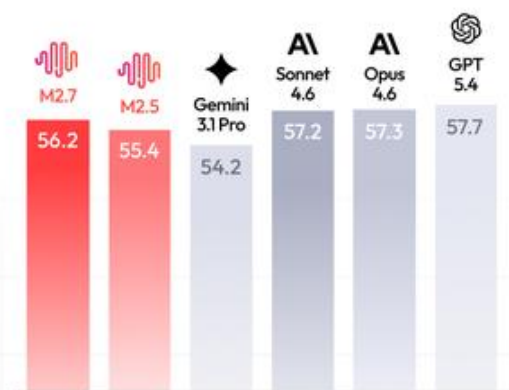

Improving Intelligence Level Drives “Model as an Application”

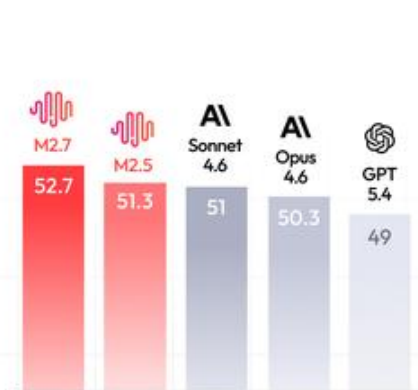

MiniMax Innovation Roadmap

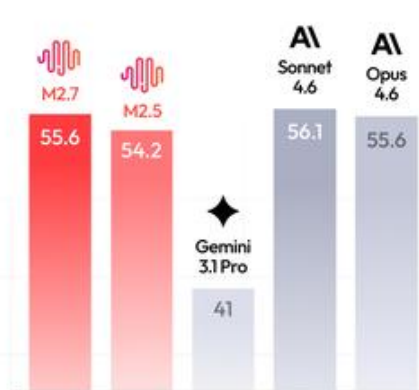

MiniMax M2.7 Early Echoes of Self-Evolution

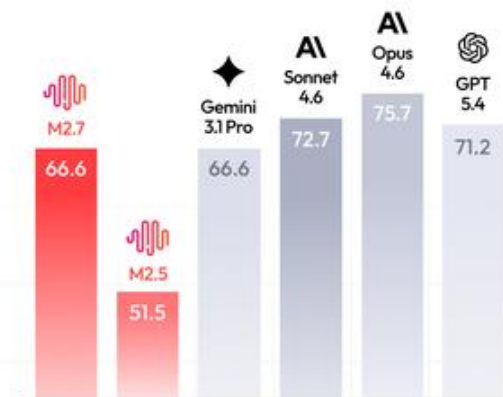

SWE Bench Pro

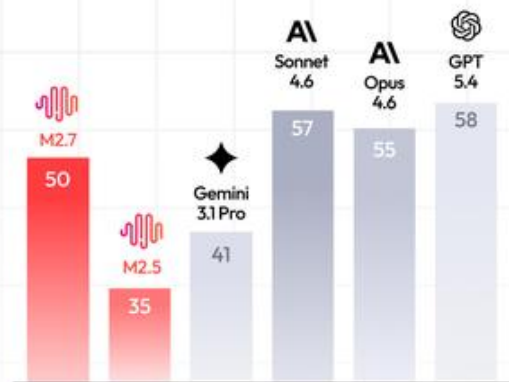

Multi-SWE Bench

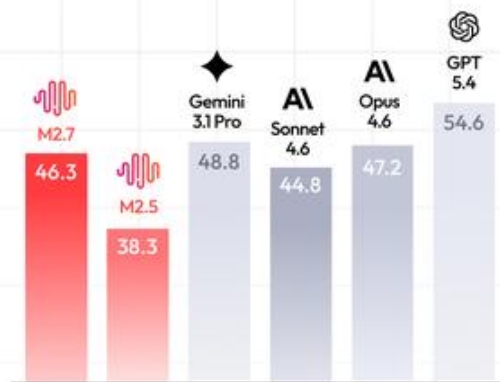

VIBE-Pro

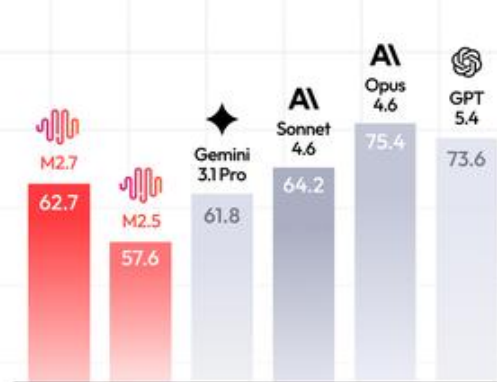

MLE-Bench lite

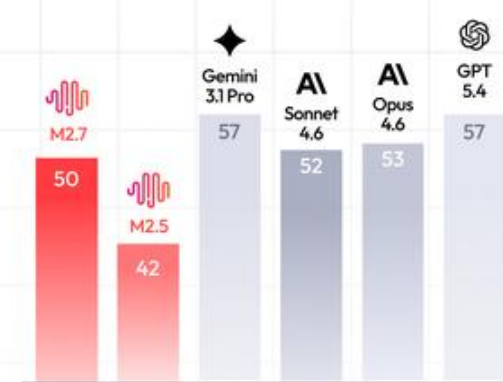

GDPval-AA

Toolathlon

MM-ClawBench

Artificial Analysis

MiniMax M2.7 Early Echoes of Self-Evolution

Production-Ready SWE

SOTA performance in SWE-Pro (56.22%) and Terminal Bench 2 (57.0%), reduced intervention-to-recovery time for online incidents to 3-min on certain occasions.

Advanced Agentic Abilities

Trained for Agent Teams and tool search, with 97% skill adherence across 40+ complex skills. M2.7 is on par with Sonnet 4.6 in OpenClaw

Professional Workspace

SOTA in professional knowledge (GDPval-AA 1495 ELO, highest among open-source models), supports multi-turn, high-fidelity Office file editing

Self-Evolution

Model updates its own memory and builds complex skills to help with RL experiments, improving its own learning process and harness

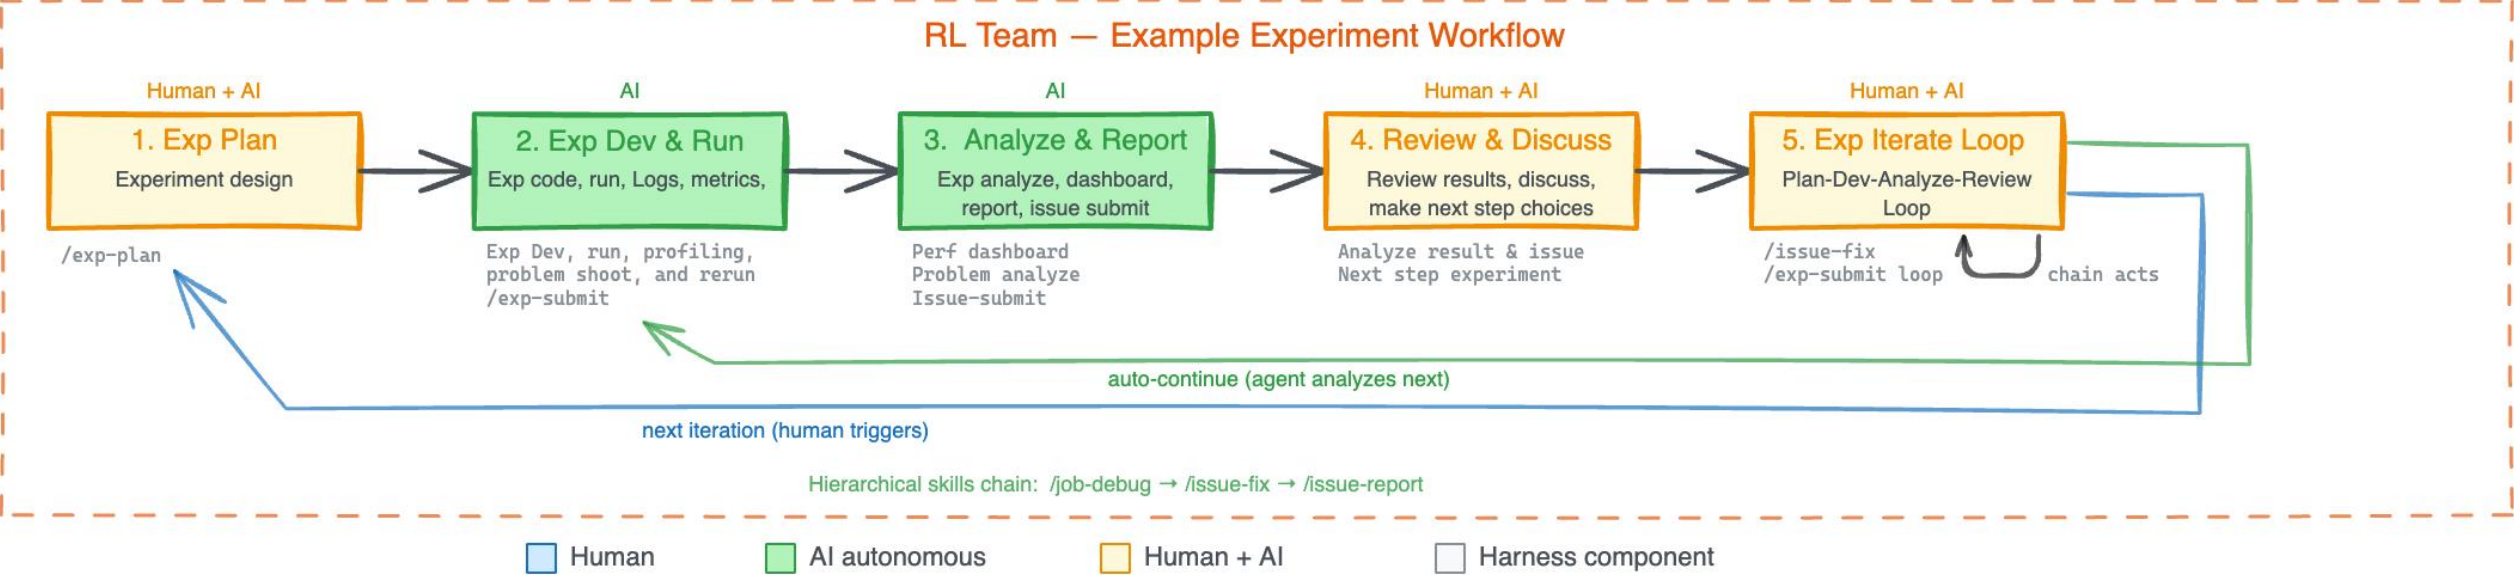

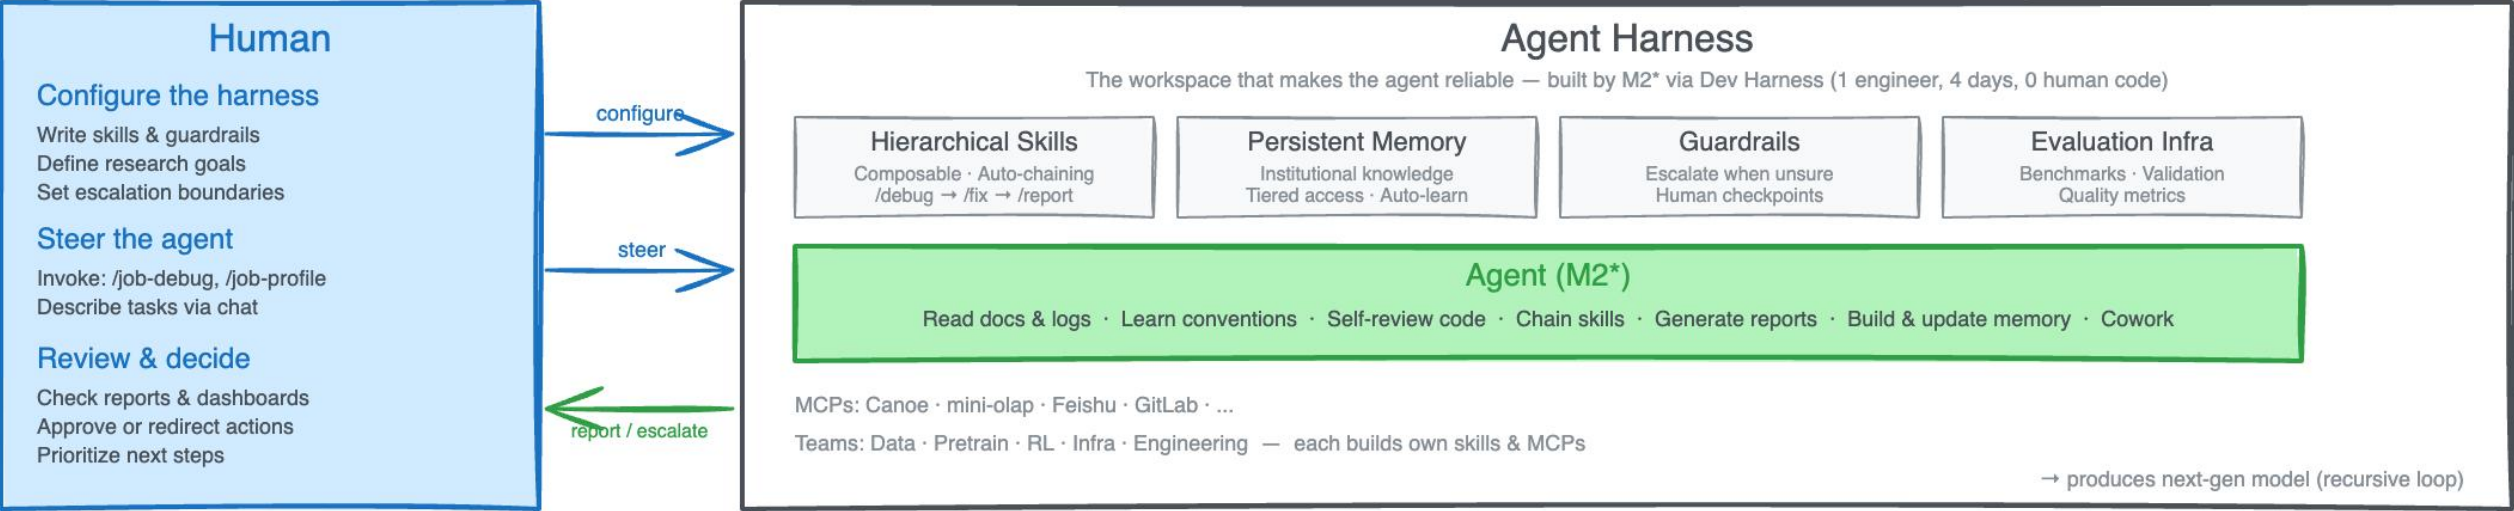

Entertainment

Excellent character consistency and emotional intelligence; open-sourced OpenRoom interactive AI demo system.

ML Use Case: M2.7

M2* Model Iteration System

Humans steer at every layer. Models build at every layer.
