

GOSIM Paris 2026

May 5-6, 2026 Station F, Paris

RoboChallenge Annual Report

Large Scale Real-Robot Evaluation for Embodied AI

Emily Chen
GM of Dexmal
Committee of RoboChallenge

The current status of VLA Evaluation

The vast majority is conducted in simulation,
while the availability of real-world testing is very limited

Robots Live Feed

This shows real-time footage of the robots running the current evaluation job (which could be yours or someone else's). Be aware that the image may sometimes lag.

🧩 Table 30 (v1) - Specialist

Rank	Model/User	Score	Success Rate
1	DM0/Dexmal 🧑	72.25	62.00%
2	GigaBrain-0.1/lyf 🧑	68.34	51.67%
3	Spirit-v1.5/Spirit AI 🧑	67.19	51.00%
4	pi0.5/rc_baseline	61.84	42.67%
5	wall-oss-v0.1/Pushi Zhang 🧑	55.30	35.33%
6	pi0/rc_baseline	46.41	28.33%
7	X-VLA/Chongyang Xu 🧑	34.75	21.33%
8	RDT-1B/zsz 🧑	28.84	15.00%

🧩 Table 30 (v1) - Generalist

Rank	Model/User	Score	Success Rate
1	Lira/Atlas 🧑	59.83	45.00%
2	Atlas_generalist/Atlas 🧑	55.10	39.67%
3	DM0_generalist/Dexmal 🧑	49.08	37.33%
4	pi05_generalist/wyf 🧑	31.27	17.67%
5	GR00T-MULTI/Sicheng Xie 🧑	29.02	13.33%
6	pi0_generalist/wyf 🧑	20.22	9.00%
7	VLA_test_0204/Xiangyue Wu 🧑	17.33	9.00%
8	VLA_test_0119/Xiangyue Wu 🧑	21.95	5.00%

What is first VLA benchmark - Table 30 ?

ARX-5

Aloha
COBOT Magic

FRANKA
PANDA

UR5

Task Name	Machine Type	Description
arrange flowers	ARX5	Pick up three flowers on the table and insert them into the vase
arrange fruits in basket	UR5e	Put four fruits into the basket on the table
arrange paper cups	ARX5	Stack five paper cups and put them into a shelf
clean dining table	ALOHA	Place trash and the dishes on the table into trash bin and basket
fold dishcloth	ARX5	Fold the dishcloth two times and put it on the side
hang toothbrush cup	UR5	Hang a cup on the cup holder
make vegetarian sandwich	ALOHA	Make a vegetable sandwich
open the drawer	ARX5	Open the drawer
place shoes on rack	ARX5	Place a pair of shoes on the shoe rack
plug in network cable	ALOHA	Insert two RJ45 connectors into the socket
pour fries into plate	ALOHA	Open the box and pour the fries onto the plate
press three buttons	Franka	Press the pink, blue, and green buttons in sequence
put cup on coaster	ARX5	Place the cup on the coaster
put opener in drawer	ALOHA	Place the can opener into the right-hand drawer
put pen into pencilcase	ALOHA	Place the pen on the table into the pencil case
scan QR code	ALOHA	Scan the QR code on the medicine box using the scanner
search green boxes	ARX5	Pick all green boxes in the pile into the yellow box
set the plates	UR5	Place the three plates onto the plate rack one by one
shred scrap paper	UR5	Stuff the paper into the shredder
sort books	UR5	Place three books into corresponding position on shelf
sort electronic products	ARX5	Put the four electronic products into four baskets
stack bowls	ALOHA	Stack three bowls together
stack color blocks	UR5	Stack the yellow block on top of the orange block
stick transparent tape to box	ALOHA	Tear off a piece of clear tape and stick it onto the box
sweep the rubbish	ALOHA	sweep the trash into the dustpan using a broom
move objects into box	Franka	Place all the clutter on the desk into the white basket
turn on faucet	ALOHA	Grasp the faucet switch and turn it on
turn on light switch	ARX5	turn on the light switch
water potted plant	ARX5	Water the potted plant using the kettle
wipe the table	ARX5	Grab a tissue to wipe the stains on a table and discard it

Where Models Win, Where Models Fail

Per-capability success rate. Each row shows the leader of that dimension.

Hard surfaces are easy. Soft, deformable, and long-horizon are still open research.

Task Difficulty Spectrum — Three Tiers

Hello-world, easy, specialty win — what 30 standardized tasks look like under the leaderboard lens.

✓ Tier 1 — Hello World

DEFINITION

Top-3 = 100%

All three top models clear the task

Representative tasks:

- stack_bowls
- stack_color_blocks

SIGNAL

Foundational manipulation has a working baseline across the leading models.

⚡ Tier 2 — Easy

DEFINITION

Top1 ≥ 90%, Top3 ≥ 70%

A leader exists; followers within reach

Representative tasks:

- place_shoes_on_rack
- search_green_boxes

SIGNAL

Visual discrimination is mostly solved; pickup precision becomes the differentiator.

🏆 Tier 3 — Specialty Win

DEFINITION

Top = 0% – 10%

Share drop after

Representative task:

- press_three_buttons

(wall-oss-v0.1 only)

SIGNAL

Architectural specialization shows. Different VLAs encode different priors — diversity is real.

Top 9 Models across 30 Tasks

Transparency and Traceable

1. The demand for testing has grown exponentially, making **real machine validation** a necessity in the industry.
2. Stacking bowls and moving objects into boxes have become "**Hello World**" level tasks.
3. Organizing paper cups and making sandwiches remain **challenging** problems.
4. The top **model's success rate** is about 60%, indicating room for improvement.
5. VLA models are still at a **very early stage**, operating at a near-basic level of human intelligence.

Roadmap 2026 — Conferences & Platform Evolution

From a 90-day prototype to a permanent venue for real-robot evaluation.

TIMELINE

 CVPR 2026 · DENVER

Table30 v2 — 18 New Bimanual Tasks

Open submissions: 2026-04-15 → 2026-05-15

120+

teams interested

96

registered

400+

participants

68 / 28

universities / enterprises

Workshop spotlight: bimanual coordination, scene generalization, long-horizon planning under real-world distribution shift.

 ICRA 2026 · VIENNA

Real Supermarket — AGIBOT Track

Open submissions: 2026-05-08 → 2026-05-25

50+

teams

Real

supermarket scene

Closed-loop

embodied evaluation

Beyond tabletop: shopping aisle navigation, cluttered shelf retrieval, multi-stage planning under live human bystanders.
